

# security has changed

Hackers' focus has changed from network to users

## Firewall

## User

**Cost of a data breach is HIGH.**

Source: IBM Cost of a Data Breach Study

## User centric attacks are at the frontline

**90%**  attacks begin with phishing emails

**30%**  of breaches are caused by negligent acts from employees or contractors

**91%**  of organizations feel susceptible to insider breaches

**51%**  security incidents occur due to privilege misuse

## User Identity is the New Perimeter

Strengthen security where it's weakest - your USERS

A Layered Approach to PeopleSoft Security for Total Visibility & Control
