

Advantages of Enabling PeopleSoft MFA with Duo/Appsian

Fastest Path to Zero Trust

Appsian is a lightweight plugin, with an implementation timeline for 2-3 weeks (avg.)

Enable Data Security

Appsian helps you focus security strategies on data, not just user authentication.

Avoid User-Pushback

Integration enables adaptive MFA that challenges based on level of risk. Ensuring MFA challenges are deployed only where business and security teams feel are most appropriate.

Enable Zero Trust in Oracle PeopleSoft with Adaptive Multi-Factor Authentication

Duo Security® Now Integrates with Appsian to Deliver Application & Transaction Level Data Security

Organizations are moving to a zero trust authentication model to manage the business risks created by the myriad of users (and devices) accessing sensitive business data. For traditional, on-premise ERP applications like Oracle PeopleSoft, establishing a deep integration that enables zero trust through multi-factor authentication (MFA) presents significant challenges.

To ensure PeopleSoft customers are aligned to zero trust, Duo Security has partnered with Appsian, the global leader in ERP data security. Duo customers can expand the use of MFA throughout PeopleSoft using application and transaction level integration.

Using the Appsian Security Platform, a configurable plugin that installs directly into the PeopleSoft web server, PeopleSoft customers can extend their current use of Duo MFA without running the risk of complex customizations or user push-back.

Risk-Aware and Adaptive MFA

Once installed, AppSIan provides the risk-aware rules engine that aligns context of access with risk – deploying MFA challenges based on user attributes:

Geographic Location

Device Type

Time-of-Day

User Role/Privilege

Step-Up Authentication at Transaction Level of PeopleSoft

Expand the use of Duo MFA, down to specific data fields within a transaction. Protect highly sensitive data fields from unauthorized access:

Direct Deposit
Account

Compensation

Social Security/
National ID

Grades or Financial Aid
(for Campus Solutions)
